

FINANCIAL MODELING

Make Sure You Have A Strong Financial Modeling Skill To Level you up in Finance Field

LEARN TO EN - CASH KNOWLEDGE

WHAT DOES FINANCIAL MODELING MEAN ?

Financial modeling involves the use of spreadsheets to summarize a company's expenses and income in order to comprehend the impact of future projects and decisions that may affect the company's stock performance. It can be used to evaluate external economic policies, business strategies, regulations, investments and other scenarios to calculate costs of new initiatives, develop financial plans, and allocate corporate resources.

Learn how to use Excel for analyzing forecasting and valuing different companies through modeling.

A career in Equity Research, Investment Banking, Credit Research, Project Finance, and Business Analysis can be accessed through this gateway.

Create concise summaries of financial research and assess various industries.

Testimonials

The course was well-structured, covering a wide range of financial modeling topics and providing practical examples and exercises that helped me better understand the concepts. What I appreciated most about the course was the environment that was so positive and faculties are very helping and friendly. The course instructor was also exceptional, providing prompt and helpful feedback on assignments and answering any questions I had throughout the course. Overall, I am very happy on completing the course.

Financial Modelling course is a must if someone is planning to have a career in finance. There are two things that I appreciated the most during the course, first is practical approach to the concepts and secondly it's not your routine classroom atmosphere, there is always a discussion and cross questioning which challenges one not only on technicality but grooms the aspirants for the real world. Happy to complete this course from FinOptions.

Learning at FinOptions was a great experience for me. The FM course is very well curated and well-structured. The faculty members are highly knowledgeable, experienced and approachable. With Gaurav Somani sir, there's always a brainstorming session, instead of a one-way lecture. He breaks down & simplifies difficult concepts really well. Aman Mourya sir uses a hands-on learning approach in Advance Excel sessions. What I like the most is that everyone is encouraged to be curious & to explore things on their own. I'm grateful to FinOptions for this experience and for helping me take the next step in my career.

Take the time to listen to them and learn from their experiences.
